

WeeklyReport_2018-10-08_10-16_E

Week Overview

- I have bad cold this week, coughing
- $6 + 9 + 6 + 7 + 6 + 0 + 9 = 43$ hours

Project: RSATree

- Complete the code for the part of lsh. However, this part was temporarily abandoned due to the difficulty of adjusting the parameters.
- Complete the Scale alignment function and completely integerized the data structure of our code. From now on the code has been the same as the submission at the time.
- The main task for the next week is to complete the json automation script. And integrate this data structure into other projects
- I still don't have time to manage the OBCD solution. I will leave this question here first.

Other

- write 5 ACM problems in Codechef
 - learn course in mlcourse.ai (Assignmant 1)
-

Short-term perspective

Work	deadline	Tip
write json part	Mon	RSATree
intergrate to other pro	Wes	RSATree
adjustment	Fri	RSATree
write one CET6 paper	Sunday	
Learn words everyday		

Middle-term perspective

Work	deadline	supplement
RSATree Project	11.01	
GraphLayout	12.01	understand the visualization part
learn d3	11.01	in http://www.ourd3js.com/
learn course in mlcourse.ai	19-1.01
